Summary

My teaching and research happen at the intersection of people, texts, and technology.

I am an Associate Professor in the Department of English and Comparative Literature, Columbia University. A former software engineer at Microsoft and currently faculty associate at Columbia's Data Science Institute, I am the author of *Plain Text: The Poetics of Computation* (Stanford University Press, 2017). My next book explores the creative limits of artificial intelligence. My research appears on the pages of *Amodern*, *boundary2*, *Computational Culture*, *Modernism/modernity*, and *New Literary History* on topics that include narratology, the sociology of literature, media history, and literary theory. I am a co-founder of Columbia's Group for Experimental Methods in the Humanities, a research collective whose work has received numerous awards, major grants, and recognition from the press in *The New York Times*, *Fast Company*, *Der Spiegel*, and *Le Monde*.
